

Good morning David

I would like to make sure council always will fund research and would like to see our river be included. Regarding large parties I know that we must address our bylaws to have some control .On the matter of public swimming, I proposed that a pool would solve a lot of problems and could be beneficial {swimming lessons ,programs for the young and old } also which intern means jobs for the youth{lifeguards caretaker } Right now there is a possible boat launch going in on the Gatineau River which I hope will appease everyone. High speed internet would be great but I am under the impression that bell has been given the contract and now it's a waiting game, but if there is anything I can do I will be more than happy. Thank you very much for your past support.
