THANK YOU IN ADVANCE FOR YOUR SUPPORT.

We would ask that you please respond to the questionnaire **by October 15**, either by email to davidprime228@gmail.com or by mail at the following address: Lakes Association of Kazabazua, P.O. Box 254, Kazabazua, Quebec J0X 1X0.

1. In their 2016 and 2018 reports on the health of the nine lakes represented by the Lakes Association of Kazabazua, the biologists of the Agence du bassin versant des 7 (ABV-7) recommended that the MRC 'develop tools for efficiently ensuring compliance of regulations and remain uncompromising when granting new permits and approving projects which would increase the use of shores or new recreational and tourism activities on shores that might compromise the health of the lakes'. This important responsibility was transferred to each municipality in our MRC in 2017 (Municipal By-law No. 2017-006 amending Zoning By-law No. 201 of the Municipality of Kazabazua to incorporate standards to establish measures for the protection of surface waters, shoreline and river banks protection).

1.1 Will you commit to developing tools for ensuring compliance with the current regulations aimed at protecting the lakes?

I commit and think it is important to continue to develop tools to ensure our lakes are kept healthy

2. In 2016 and 2018, the Municipality and the Lakes Association of Kazabazua cofinanced a study of the health of the nine lakes by the Agence du bassin versant des 7 (ABV-7). This study is to be used as a baseline for the regular monitoring of the health of the lakes in the future.

2.1 Would you be prepared to recommend to Council that financial support for LAK in lakes health research be provided again when necessary?

I would recommend to council for support and financial support

3. In 2019, 2020 and 2021, rave parties on private properties disrupted the peace and quiet of many residents (permanent and seasonal). They also caused great concerns related to the spread of the Coronavirus. According to Art. 17 of the Municipal By-law on Nuisances (No. 2017-003), 'The person responsible for the application of this by-law is any officer or municipal employee appointed by the council.' According to Art. 17 again, the Municipality can request assistance from the Sûreté du Québec in this matter.

3.1 Do you commit to consulting with the Lakes Association of Kazabazua on such de issues that directly affect its members?

* I do not approve of Rave parties. I will consult LAK and keep the Association updated. I will consult Municipal Affairs for stopping any Rave Parties.

3.2 Will you commit to clarify the respective roles of the Municipality and of the Sûreté du Québec so that Kazabazua residents know exactly what hon expect from them and how to proceed during such events?

I will clarify the roles of the Mun of Kaz, Sûreté du Que and Municipal Affairs, so that the Residents know exactly to expect.

3.3 Given the disruptive nature of these parties, would you be amenable to limiting the number of hosts and the frequency of these events?

I do not approve of any disruptive parties, so I will do my best to stop these parties, perhaps passing a by-law to be able to cancel these parties once and for all.

4. Public access to waterways for launching boats and swimming—The outgoing municipal council committed to consulting with the Lakes Association of Kazabazua in the development of options to respond to the wishes of some residents of Kazabazua to have a public access to water for swimming and boating. All the lakes represented by our Association are fragile ecosystems showing early signs of aging, which led ABV-7 biologists to recommend shoreline restoration measures aimed at slowing down that process, preserving fish habitat, and preventing the introduction and spread of invasive species.

4.1 Will you honour this commitment and continue consulting with the Lakes Association of Kazabazua?

Yes I will honor this commitment, and consult the LAK.

The outgoing Council included, among several options, opening a site on one of the lakes exclusively for swimming. In their reports, ABV-7 biologists raised concerns and recommended against 'approving projects which would increase the use of shores or new recreational and tourism activities on shores that might compromise the health of the lakes'.

4.2 Do you agree that any proposal to open a site on one of the lakes should receive environmental scrutiny, and if the new Council is able to secure the necessary governmental approvals, will you commit to putting measures in place that will (in adherence with the ABV-7 recommendations) preserve the lake's shoreline integrity, protect its water quality and fish habitat, prevent the introduction of invasive species, and preserve the peace and quiet of the lake's residents?

*I would not agree on any proposal to open any site,.....
With out environmental scrutiny.....*

5. Over the past year, the Lakes Association of Kazabazua has actively supported efforts by the Municipality of Kazabazua and the MRC Vallée-de-la-Gatineau to bring high-speed Internet to the Region.

5.1 Will you commit to ensuring that the high-speed internet accessibility program is available to all residents of our region and that the same quality service is provided to all?

*I will continue to work on high-speed internet,.....
So all residents would have the same quality.....*
