

Dear Mr. Buffel and Members of the Lakes Association of Kazabazua,

Thank you very much for sharing your questionnaire and for taking the time to outline the issues of importance to your members. I appreciate the proactive role that the Association plays in raising awareness and encouraging dialogue on matters that affect both the local community and the environment.

By way of introduction, my name is André Adams-Robenhymmer. My academic background combines economics, politics, and law, with a focus on data and statistical analysis. I have been working for the federal government for over 15 years in various capacities. I currently serve as a Senior Economist at Canadian Heritage, where I contribute to the design of policy, regulatory, legislative, and institutional reforms. I believe that this background would position me well to collaborate with the Association in identifying constructive paths forward on shared priorities — notably by helping to gather relevant data, build evidence-based cases, and articulate clear rationales for potential municipal interventions.

As a new candidate, I am still in the process of familiarizing myself with a number of the issues raised in your questionnaire. While I am not in a position to make specific commitments at this stage, I can assure you that I take these concerns seriously. If elected, I commit to carefully assessing each of these matters, bringing them forward for discussion with Council and relevant partners, and supporting thoughtful consideration of appropriate actions where needed.

I value the constructive relationship that has developed over the years between the Association and the municipal council, and I would look forward to contributing to this dialogue in a respectful and collaborative way.

Thank you again for reaching out and for the important work your Association does on behalf of the community.

Sincerely,

André Adams-Robenhymmer

Candidate for Municipal Councillor – Kazabazua Municipal Elections 2025
