

Dear Mr. Buffel,

I have received your questionnaire and would like to respond globally.

First, I do not have the same approach as the other candidates; I want to do things differently!

Protecting and preserving the environment, including lakes and rivers, is essential. We are all residents of Kazabazua, which in the Algonquin language means underground river. It would be unacceptable not to protect this precious resource!

That being said, I will not answer as most politicians would, I leave those empty words to others.

My commitment to the members of your association, as well as to all the citizens of Kazabazua, is to listen to your concerns and projects. I promise to meet with you to learn more and get all the information necessary to make responsible and sustainable decisions.

Let's do things differently!

Katia Paladin

Candidate for Kazabazua mayor
