

Good Morning.

Thank you for taking an interest in the election.

1. I am very concerned with the health and well being of our lakes and rivers. I firmly believe that we live in one of the most beautiful areas in the country and that our lakes and rivers are a fundamental part of that beauty. As such, keeping our lakes safe is extremely important to me. We need to work to find a balance between usage and protection. How can we find a way to allow people to access the beauty of our lakes and rivers while at the same time keeping them pristine and protected?
2. As mentioned above, I am committed to keeping our natural resources protected and so would be in favour of funding initiatives that can help protect them.
3. I do not believe that these parties were properly organized or planned and so I am against them in the way in which they occurred, however, if they could be done in the proper fashion, in the proper location (like the former "Gatineau Clog") I feel that they have the potential to be a positive for the community.
4. Without question I support the request to protect our land, not just around our lakes but anywhere in the municipality and surrounding area. I am against mining anywhere in our area.
5. I have already brought up this topic with the council and if elected I will ensure that we have something in place for next summer. My desire is to have some type of permanent washing station as they have in Lac Ste Marie.
